KNING OF THE NATE OF THE VICON HOTEL, Nonday, July 19. ALES PROPRIETORS. STU-ll the Railroad and Strandill pass the house even for the

Amorican continent. On all sides the surest proof of the antiquity of man is regarded as furnished by \$1.2.31. A writer in the Popular Science Monthly for November attempts to apply to recent discovregarded a Europe as fixing the antiquity of man at a period prior to the last exercise of the energy within our now morth temperate glavial energy within our now morth temperate cannow Height delicities and the starting point for delicities and the starting p zone. He finds his starting point in the dis-covery of implements fashioned by human hands in the glacial drift of the Delaware, near plorable respect, and others maintain that it hands in the glacial drift of the Delawary, man plorable respect, and others maintain and a treatment of stone, as of higher authority upon the quisition of man's pro interest and an increase far beyond that of last results that the first transfer of the stone of the property of the stone of the property of the stone of the ston covered in California and elsewhere, since these accorded in California and elsewhere, since these transplants been first dearl in later times into the situations where they are now found. Again, it is observed that human bender due to differ much from one age to another, but implements of human construction and use bear environment have an appreciable influence of the contract of the people of the greater than the contract of the people of the greater than the contract of the people of the greater than the contract of the people of the greater than the contract of the people of the greater than the forget fact of permanent different people of the greater than the forget fact of permanent different people of the greater than the forget fact of permanent different people of the greater than the forget fact of the greater than the greater than the greater than the fact of the greater than the g plements of human construction and use bear manufactually influence manufactually stamped in them the impress of the age that made and used them. These stones implements in the Delaware villey drift were tanking, artificially and several them common to the people of the stone age in both continents. It is regarded as uncombined ago indicated that in Sweden there was one that the arctin conditions now exhibits that the arctin conditions now existing amounts to overy 92,375 inhabitant upon the northern rm of the American contist. In Russia, one to 34,246; in the United State nent extended in the glacial period as far south one to 15,000; and in Saxony, and to 8,446. Our proportion would now be very much as the Delaware, valley. About the artice arcle there is still a people rotaining the charge. Among the rarial populations the error
foristics, the habit, the implements of the
stone age. So the writer thinks that I hardy
race of people owaring turn and subsisting

continue the state of the state o northern climes existed on the north Atlantic country people to seek life in towns is still incoast of America in glacial times, and with-draw northward as the ice belt narroyed, until its only traces are now found in the Esquintaux of the arctic circle. He advances the opinion in America On all sides, it is regarded as solid that the Indian recession on the cannot be added that the Indian recession on the cannot be added that the Indian recession of the scanning and southern parts of this continent upon its discovery by European's four centuries upon had been here but a comparatively short time.

They certainly are not the men of the stone growth of the continuous politics who abounded in the same the some years ago ever made the United States a party.

The census shows that in Massachusette the stone of females over makes is 66,044. The total propulation is 1728 one.

A PLAN TO 3 the ANERICA.

That well known English periodical, the total population is 1,783,085. The gain in tor Minctonth Century, in its November number rears is 33,735. argues that there is no good reason for suppos-ing that the limit of wheat production has ing that the limit of wheat production has been reached in England. It recalls he days of Arthur Toung, a cantury ago, when the arm with a sufficient of the control of the erogo yield per acre was but sixteen bushels, and the rilicule that was showered upon Young's writings from all parts of England because he undertook to show that with judicious use of tertilizers, deep ploughing and thorough tilth, the crops could be doubled. And since that time the yield per sore has in fact mearly doubled; the average being now about thirty bushels. Competition from American wheat is now so strong that snother advance stop in En glish agriculture must be taken. That is, the British farmer must not sleecumb with the humiliating confession that so is honelessly book en; and the periodical above named argues for him that by changing his mode of culture he may double biserop aga n. It is curious to note the most east through which it is suggested that this desirable result may be reached. It is the simple plan of planting single grains of wheat 922 inches apart. The basis of this san-guine claim is two alleged facts which it is said have been amply tested by actual experiment. The first is that the number of heads of wheat produced for scre—in the absence of injurious comstance, is virtually the same, whe her the quantity of seed sown be at the rate of one or two or three bushels per sore. The nur ber ads of wheat in either case will be about 1,250,000 per sere. And if the sixth of a bush-el be planted in single grains, nine mehes a part each way, the number of heads produced will or about the same, or a little in excess—1,400,000. This sameness of result as negards the number of wheatneads produced is explained by the fact that when the wheat is sown at the rate of two or three bushels to the acre the young plants baye but little charce to put forth additional stems "tiller; or "glool out" as we say in his country; while if projections be given to each plent, it will extend itself by the fillering process until it ocvers a space of from four to six mehes in diameter, and the single seed will produce from seventy to nicety well developed eads. The second fact be which this school for getting the start of the American wheatraiser is certainly, important if true; for upor it hinges the possibility of the whole theory of increasing the British wheat yield to an average

light one to emanate from a grave periodical which is supposed to be above jests and preril-ties. If England is going to got an average of sixty bushels of wheat to the acre what is to provent America from imitating the method and doing likewise? And then the competition

is an accorded one that whatever the Value of the narrative in other respects, it has no scientific value is an early and actual chronological through the property of the pro tion to population than in any other state. Rhode Island has always been extremely gonservative, as is demonstrated by the fact that until forty years ago she nover had a constitu-tion. Down to that time she continued under of extremely recent appearance as compared the old colonial, charter of 1863. Under the old recent the old rece with many others whose temains are preserved in the base m of this carta, invertheless has a did regime the voters included only the purpose has have notherally be a pushed further and with more minutoness than in any other part of the Robe; and the evidence is deemed conclusive that man existed there before the close of the last glacial period, which may have been anywhere from 80,000 is 100,000 years ago. The
evidence as to the existence of primitive man in
America, has not as yet been examined with so
much painstaking and sejontific care. The discussion has been confined chiefly to reduce the manufacturing industries. Although pussion has been excluded chiefly to rather in the maintineturing instances. Attoning the flefinite speculations upon the ethnological relations of the prelatoric, but not necessarily primitive peoples who preceded the American Indians in the compation of the 29,000 of the 79,000 adult males of Rhode I and youtst in the recent election. Another proof of the antiquity of man is regarded as requires a poll tax of \$1 to be paid by the section; which nake it contains the implements of, primitive times—in situations which nake it contains that great forces of nature; as glecial action, they been in operation since the hand of man fashioned thom.

A writer in the Popular Science Monthly for There is an urgent need for reform in litt of Rindy, if they is anywhere is any they are the properties. Rhody, if there is anywhere.

> plorable respect, and others maintain that it suicide annually to every 92.375 inhabitants;

Claus Sprockles of San Francisco, the man who is making millions out of that treaty with of the arcelic circle. He advances the opinion who is making cullilions out of their treaty with last that this arctic nigration may have been hastoned, if not caused, by the presence upon have been quacked, is creeting a new again to the continent. However that hap be, there are the rimains, a precord of a very remotive time, in the clay and boulder drift of the Delaware valley, where such remains doubt have fore the lay and boundered and lorged only a pleaser. were valley, where such remains deadd have been gathered and longed only by placial agency. We can not attempt anything like a summary of the writer's online theory of glacial man ir. America, fortified as it is by sointified and historical intheority too voluminous of review, but morely give an quatino of his proper to add that the record of the drift, it to trainant this treaty. Such notice may be many thousands of years are used that is so any generally accepted by the scientific world, also proves him to have been of similar antiquity in America [old all index it is required, as settled that the Indian recess found on the center of the indian recess of the proper in America [old all indies it is required, as settled that the Indian recess found on the center of the proper is the intercased the prince of the prince of the indian recess found on the center of the indiant recess for the indiant recess for the indiant recess in the i

45 Years Before the Public. THE CENUINE

DR. C. McLANE'S

CELEBRATED

LIVER PILLS FOR THE CURE OF Hepatitis, or Liver Complaint.

DYSTERSIA AND STEE HEADACHE Symptoms of a Diseased Liver.

DAIN in the right side, under the and the right state, under the redge of the ribs, increases on pressure; sometimes the pair is in the left side; the patient is rarely able to lie on the left side; sometimes the pain is felt upper the shoulder blade, and it frequently extends to the top of the shoul ler, and is sometimes mistaken for theumatism in the arm. The stometh is affected with loss of appetite and sickness; the bowels in genwith lax: the head is troubled with pain, adcompanied wit a dull, heavy sensation in the back part. There is sation of having left undone some-

senerally a considerable loss of memcry, accompanied with a painful senthing which oug it to have been done.
A shight, dry cough is sometimes an attendant. The ration complains of weariness and depility; he is easily startled, his feet are cold or burning and he complains of a prickly sensation of the sk n; his spirits are low; and although ic is satisfied that exer he can scarce y summon up fortitude enough to try it. In act, he distrusts every remedy. Several of the above symptoms attend the cisease, but cases have occurred where 'ew of them existed, yet examination of the body, after death, has shown the LIVER to have been extensively deranged.

AGUE AND FEVER.

DR. C. McLANE'S LIVER PILLS, IN CASES OF AGUE AND FEVER, when taker, with Quinine, are productive of the most happy results. No better cathartic can be used, preparatory to, or after taking Quinine. We would advise all who are afficted with this disease to give them a FAIR TRIAL.

For all bilious derangements, and is a simple purgative, they are unequa ed.

BEWARE OF INITIATIONS. The genuide are never sugar centrel. Every box has a red was seal on the lid, with the impression Dr. McLang's Liven

The genuine McLane's LIVER PILLS bear the signatures of C. McLane and Fleming Bios, on the wrappers, genuine Dr. C. McLANE and FLEMING Bios, on the wrappers, genuine Dr. C.
